

BREAKING NEWS:

From Europe an Advanced Grant for Professor Maria Concetta Morrone

The ERC grants funding of 2.5 million euros to a Pisa University professor for a study project in the field of cognitive neuroscience

A project from Pisa University has been awarded an Advanced Grant from the European Research Council (ERC): Maria Concetta Morrone, Professor of Physiology at the university, has been granted funding of 2.5 million euros for the period 2014-2018 with a research project in the field of cognitive neuroscience. "Early cortical sensory plasticity and adaptability in human adults" is the title of the project, which aims to investigate the plasticity and the capacity for change of the adult brain through experimental studies carried out in a clinical environment and which concentrate in particular on visual properties.

The study will be carried out with the scientific collaboration of the Pisa University and the University of Turin.

In the course of the project funded by the ERC, the researchers will propose a series of experiments.

The research team is made up of university professors (one of the first ERC grants in Italy) and researchers who have worked with Maria Morrone.
